Professional Summary

Software Developer with experience building responsive and user-focused web applications. Started as a Frontend Developer and gradually expanded into full-stack development, gaining experience across the software development lifecycle. Passionate about solving real-world problems, writing clean and maintainable code, and delivering high-quality digital experiences. Continuously learning and adapting to new technologies to build scalable and impactful solutions.

Technical Skills

Frontend: Next.js, React.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, Framer Motion

Backend: Node.js, Express.js, REST API Design, JWT Authentication, Bcrypt

Database: MongoDB, PostgreSQL, MySQL, Redis, Kafka

Cloud & Tools: Cloudinary, Docker (basics), Git, GitHub, Postman, Figma, VS Code

Concepts: MVC Architecture, RESTful APIs, Cookie-based Auth, Performance Optimisation, Microservices

Education

Government Women Engineering College, Ajmer (Bikaner Technical University)

2019 – 2023

B.Tech in Computer Science and Engineering

Experience

Lunar Edge IT Services

Jaipur, Rajasthan

Frontend Developer / MERN Stack Developer

Oct 2024 – Present

- Developed scalable, responsive, and interactive web applications using React.js, JavaScript, and Tailwind CSS.
- Collaborated with backend teams to integrate APIs and ensure seamless data flow between frontend and backend systems.
- Built reusable and maintainable UI components, improving development efficiency and code quality.
- Translated Figma designs into pixel-perfect, responsive user interfaces while maintaining design consistency.
- Enhanced user experience through modern design systems and smooth animations using Framer Motion.

YashRaj Creations

Bhilwara, Rajasthan

Web Developer

Dec 2023 – Sep 2024

- Designed and developed responsive, dynamic websites using HTML, CSS, JavaScript, and Bootstrap.
- Ensured cross-browser compatibility and consistent performance across multiple devices and platforms.
- Optimized website performance and functionality for faster load times and smoother interactions.

Projects

Secure Authentication & Authorization System [[Github](#), [Demo](#)]

Stack: React.js, Node.js, Express.js, MongoDB, Redis, JWT

- Developed a full-stack authentication and authorization system using React.js, Node.js, Express.js, and MongoDB, featuring secure user registration and login with Bcrypt password hashing.
- Implemented JWT-based authentication, protected routes, role-based access control (Admin/User), and Two-Factor Authentication (2FA) with OTP verification and Email notification.
- Enhanced application security with rate limiting, while designing responsive authentication pages and integrating RESTful APIs.

AI-Powered Job Portal (Microservices Architecture) [[Github](#), [Demo](#)]

Stack: React.js, Node.js, Express.js, MongoDB, Redis, Kafka, JWT, Bcrypt, Docker, Typescript

- Developed a scalable Job Portal web application using a microservices architecture with Next.js, Node.js, Express.js, PostgreSQL, Kafka, Redis, and TypeScript, ensuring high performance and reliability.
- Implemented key features including login/registration, profile management, recruiter dashboard, job application workflows, and AI-powered tools such as Resume Analyzer and Career Guidance.
- Designed event-driven communication with Apache Kafka, optimized performance using Redis caching, and email notifications, and secure password reset functionality to enhance user experience and scalability.
